Standard Laptop Procurement – Customer Journey Map

Project: Automating Standard Laptop Orders using ServiceNow Flow Designer

	1 Open ServiceNow Access ServiceNow and open the Service	2 Select Laptop Open Hardware and select Standard Laptop.	3 Submit Request Click Order Now and submit the request.	4 Get Approval Request waits for manager approval.	5 Create Task After approval, Flow Designer creates a	6 Assign Task Task is automatically assigned to the Hardware	7 Process & Verify Hardware team processes the task and status is
STEPS What does the person typically experience?	Open ServiceNow and access the Service Catalog	Open Hardware → Standard Laptop	Click Order Now and submit the request	Request goes through manager approval	Approved → Catalog Task is created automatically	Task is automatically assigned to Hardware	Hardware processes task; status is verified
INTERACTIONS What interactions, people, places an things are involved?	ServiceNow portal	Service Catalog / Hardware	Laptop order form	Manager / approver	Flow Designer + Requested Item	Hardware team + Catalog Task	Requested Item / Catalog Tasks
GOALS & MOTIVATION What is the person's primary goal at each step?	Help me start the laptop request quickly	Help me choose the required laptop	Help me submit the request easily	Help me get approval without delay	Help me avoid manual task creation	Help me reach the correct team automatically	Help me get fast and consistent processing
POSITIVE MOMENTS What feels productive, motivating or successful?	Clear Service Catalog entry point	Standard Laptop is easy to select	Request is submitted in one process	Approval status is visible	Task creation happens automatically	Correct Hardware assignment is automated	Faster and more consistent processing
NEGATIVE MOMENTS What feels frustrating, confusing or time-consuming?	No automation configured	Manual process can cause delays	Manual task creation can cause errors	Waiting for approval delays progress	REQ/RITM tasks need manual creation	Wrong group assignment can occur	Follow-ups and status checking waste time
AREAS OF OPPORTUN How might we make each step bette	Use Flow Designer for the workflow	Automate the Standard Laptop process	Trigger task creation after approval	Use Approval = Approved condition	Auto-create the Catalog Task	Auto-assign the Hardware group	Link task to Requested Item and improve visibility

GOAL

Automate Standard Laptop orders using Flow Designer to reduce manual effort and errors.

Approval → Auto-create Catalog Task → Link to Requested Item → Assign to Hardware → Fast, consistent processing
